

Saad A Siddiqui, MD

Dr. Saad A Siddiqui is an attending pediatric cardiologist and the Associate Director of Perinatal Cardiology at Advocate Children's Hospital located in Oak Lawn, IL.

Philips Ultrasound Clinical Service Specialists will assist in the course delivery.

Courses

Color and Spectral Doppler Imaging of the Fetal Heart (GISP025VILT)

This one-hour Virtual Speaker-Led Training course will cover the physics of Doppler imaging along with how best to optimize 2D images and Doppler waveforms. Normal and abnormal Doppler patterns encountered in performing a fetal echocardiogram will also be discussed. The application of Doppler imaging in fetal echocardiography is used for the assessment of hemodynamics and cardiac function along with fetal well-being and will be reviewed to aid in the diagnostic outcome for fetal management.
